Dear Friends,

I've been asked to make a correction to this assessments article. The original said that we were projecting a 6% increase in the circuit budget. This was a mistake. The 6% actually referred to the increase in the district assessment raised on our circuit. This is only one of our items of expenditure. Some of our other costs, such as the figures for salaries and council tax have not yet been finalised. However as we will have one less Minister from September 2018, we do not expect the overall budget to rise and we would hope therefore not to have to raise the assessments for local churches. I'm grateful to those who have been in touch to point out this mistake.

Best wishes,

Tony
